

PROFESSIONAL SUMMARY:

Developer with experience in building and maintaining web applications using JavaScript, Node.js, and React. Strong problem-solving skills with a solid foundation in computer science, algorithms, and software engineering. Experienced in freelance, startup, and remote environments, delivering functional and user-focused applications.

AREAS OF EXPERTISE:

- ✓ Front-end & back-end web development
- ✓ REST APIs & Backend Integration
- ✓ Code structure & architecture
- ✓ Algorithms & Data Structures
- ✓ Web performance optimization
- ✓ Git & Version Control
- ✓ Node.js Development
- ✓ Problem Solving & Debugging

PROFESSIONAL EXPERIENCE:

Frontend Developer Engineer

RWS Group / April 2025 – May 2026

- Worked remotely on frontend development and AI-related projects
- Contributed to web interfaces, UI improvements, and development workflows
- Collaborated with distributed teams in a remote environment

Frontend Developer Intern

Teal ElGhazali / 3 Months

- Worked as a Frontend Developer in a startup environment
- Assisted in building and improving responsive web interfaces
- Collaborated with the team on modern frontend development tasks

Freelance Web Developer / 2023 - present

- Built web applications and frontend/fullstack solutions for local and remote clients
- Developed responsive, user-focused UI designs and modern web interfaces
- Delivered end-to-end client projects using modern JavaScript frameworks and Node.js
- Worked on application development, API integration, and fullstack solutions
- Improved performance, usability, and maintainability of existing web applications

SOREMED

6 Months Internship

- Assisted with accounting and administrative tasks
- Worked in a professional office environment and gained organizational experience

RELEVANT PROJECTS:

- Built and completed 6+ web development projects
- Developed projects using React.js, Node.js, JavaScript, and modern frontend technologies
- Created responsive and modern UI/UX designs
- Worked on fullstack and frontend-focused applications

EDUCATION:

- ALX Fullstack Software Engineering Certificate — ALX (2021 – 2022)
- Fullstack training focused on software development, problem-solving, and frontend/backend technologies.
- CS50 – Introduction to Computer Science — Harvard University (2020)
Core computer science fundamentals including algorithms, programming, and problem-solving.
- 1337 Coding School – Pool Bootcamp — 1337 (2023)
Intensive training in C programming, algorithms, and low-level problem-solving.
- Additional Courses — Udemy
Completed 3+ courses in Computer Science, Fullstack JavaScript, and Node.js development.
